AND KOMSOMOLSK AIRFIELD

~~TOP SECRET CHIESS~~

HTA/M-27/58

KOMSOMOLSK AIRFRAME PLANT 126,
KOMSOMOLSK AIRFRAME PLANT 130,
AND KOMSOMOLSK AIRFIELD

Komsomolsk Airframe Plants 126 and 130 and the Komsomolsk Airfield are located in the northeastern outskirts of Komsomolsk, USSR. According to the Target Mosaic these plants are engaged in the production, overhaul and repair of jet fighter aircraft and are the only known producers of combat aircraft in the Soviet Far East.

Plant 126, located 500 yards southeast of Komsomolsk Airfield, occupies an area roughly 2,800 feet square and has a roof cover of approximately 984,000 square feet. Plant 130, located on the west side of the Komsomolsk Airfield, 1,000 yards northwest of Plant 126, occupies an area about 3,500 by 2,100 feet and has a roof cover of approximately 50,000 square feet. Both plants are rail served and fenced.

Komsomolsk Airfield is the test and flyaway field for aircraft produced by Plants 126 and 130. The runway, oriented north/south, measures approximately 6,400 feet by 260 feet. At the time of photography there were 98 Frescoes, one probable Cab, two liaison-type, and one small unidentified aircraft on the field.

Major components of Komsomolsk Airframe Plants 126 and 130 are identified on the accompanying line drawings and described in the following keys to annotations.
